BEACH 2008

The 8th International Conference on Hyperons, Charm and Beauty Hadrons

22-28 June 2008 at the University of South Carolina, Columbia

TOPICS

* Production of heavy flavors at $e^+e^-$ and hadron colliders
* Rare decays of heavy flavors and windows on new physics
* Polarization and hadronization of hyperons
* Precise determination of CKM parameters and CP-violation
* Low-$P_t$ and semi-exclusive processes, simulation of hadronic cascades, and implications for $\pi/K$ flux and neutrino beams

INTERNATIONAL ADVISORY COMMITTEE

Calvin Kalman, Concordia University (Chair)
Teodor Siemiarczuk, Institute for Nuclear Physics, Warsaw
Carlo Caso, University of Genoa (in memoriam)
Laurence Littenberg, Brookhaven National Lab
Rosanna Cester, University of Torino
Karl Berkelman, Cornell University
David Websdale, Imperial College
Michael Kraemer, RWTH Aachen
Marjorie Shapiro, UC Berkeley
Antonio Ferrer, IFIC, Valencia
Gigi Rolandi, CERN
Stan Brodsky, SLAC
David Hitlin, Caltech
Joel Butler, Fermilab
Guido Altarelli, CERN
Chris Quigg, Fermilab
Albrecht Wagner, DESY
Hirotaka Sugawara, KEK
Patrick Roudeau, Paris-Sud

ORGANIZING COMMITTEE

Sanjib R. Mishra, University of South Carolina (Chair)
Jeffrey R. Wilson, University of South Carolina
Milind V. Purohit, University of South Carolina
Roberto Petti, University of South Carolina
Marco Bozzo, University of Genoa
Calvin Kalman, Concordia University
Nickolas Solomey, Wichita State University
Carl Rosenfeld, University of South Carolina
